Der Frevler

wollte Gott sehen

Doch er sagte „Du kannst ihn nicht sehen“

Der Kaiser beharrte darauf

Gott sehen zu wollen

und verglich ihn mit dem Löwen

Da erschien ihm das Bild eines Löwen

und weit entfernt brüllte er

Schrecken befahl ihm und sein Reich

der Löwe kam näher

und brüllte wieder

sein Brüllen wurde unerträglich

da bat der Kaiser ihn

er möge den Löwen zurückschicken

was

auch

geschah

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in the health sector has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as heart disease, diabetes, and asthma. This has led to an increase in the number of people who are admitted to hospital and the length of their stay. In addition, there has been a growing emphasis on preventive care, which has led to an increase in the number of people who are screened for cancer and other diseases.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for social care services. The number of people who are over 65 years of age has increased significantly in the last few decades, and this has led to an increase in the number of people who need care and support. This has led to an increase in the number of people employed in the public sector who are working in social care services.

There are a number of challenges facing the public sector in the UK. One of the main challenges is the increasing demand for services, which is putting pressure on the public sector to increase its resources. In addition, there is a growing emphasis on cost-effectiveness, which is leading to a reduction in the number of people employed in the public sector. This is a concern because the public sector is responsible for providing a wide range of essential services, and it is important to ensure that these services are of high quality and accessible to all.

There are a number of ways in which the public sector can meet these challenges. One way is to increase the number of people employed in the public sector. This can be done by recruiting more people and by providing training and development opportunities for existing staff. In addition, the public sector can improve its efficiency and reduce its costs. This can be done by streamlining processes and by using technology to improve service delivery.

It is important to ensure that the public sector is able to provide a high quality of services to all people in the UK. This requires a commitment to excellence and a focus on the needs of the people who are using the services. The public sector has a unique role to play in society, and it is important to ensure that it is able to fulfil this role effectively and efficiently.
